PROFESSIONAL SUMMARY

Results-driven full-stack developer and BCA student experienced in building scalable web applications. Proficient in modern frameworks to design secure backend APIs and responsive frontend interfaces. Actively seeking a backend or full-stack software engineering internship to contribute to real-world tech products.

TECHNICAL SKILLS

- Frontend Technologies: React, Next.js
- Backend & Databases: Python, Django REST Framework, Java, PostgreSQL
- Tools & Version Control: Git, GitHub, VS Code, REST APIs

KEY PROJECTS

CodeVault (Freelance & Escrow Platform)

- Architected a secure web platform utilizing Next.js for the frontend and Django REST Framework for the robust backend infrastructure.
- Integrated PostgreSQL for data management and implemented secure payment gateway logic.

Developer Services Dashboard

- Designed and implemented responsive frontend interfaces, including landing pages, user flows, and authentication modules.
- Streamlined navigation utilizing modern UI frameworks to enhance developer project management features.

JobFit AI (Resume Generator)

- Developed an application utilizing Python and Java to automate text formatting tasks.
- Managed source code through Git and hosted the live repository on GitHub for deployment.

EDUCATION

- Bachelor of Computer Applications (BCA) - Shambhunath College of Education (Expected May 2027)
- Intermediate (12th) - UP Board
- High School (10th) - UP Board
